EXPERIMENT STATION LIBRARY

INSPECTION OF COMMERCIAL FEEDING STUFFS

Made for the
STATE DEPARTMENT OF AGRICULTURE

The inspection of commercial feeding stuffs reported in this bulletin was made under the direction of Honorable Andrew L. Felker, Commissioner of Agriculture. Mr. E. D. Sanborn, State Inspector, collected samples of 386 brands of feeding stuffs which were offered for sale in the State during the year ending June, 1933.

THE LAW

The New Hampshire law, entitled an Act to Regulate the Sale of Concentrated Commercial Feeding Stuffs, requires every manufacturer or dealer who shall sell or offer for sale any concentrated commercial feeding stuff to furnish with each package a clearly printed statement certifying the net weight of the feed contained in the package, the brand name or trademark under which the feed is sold, the name and address of the manufacturer, the ingredients of which the feed is composed, and a chemical analysis stating the minimum percentage only of protein, fat and carbohydrates, and the maximum percentage only of crude fiber.

The chief purpose of the administration of the Feeding Stuffs Law is to protect the consumer against the inferior products which would doubtless soon appear on the market if the trade were not under state control. The law requires that full information be available to the purchaser both as to the guaranteed analysis of the feed and the materials of which it is composed.

It must not be assumed by the purchaser of feed that every brand which meets the manufacturer's guarantee is a high-grade feed. The Feeding Stuffs Law does not prevent the sale of a low-grade feed if it is properly licensed and tagged and is offered for sale in compliance with the law. It would not be in the public interest to legislate against the sale of

the lower grade by-products. They can be fed profitably if bought at a price adjusted to their feeding value. The law aims only to prevent an inferior feed being offered for sale as a high-grade product. The purchaser must use his own judgment whether or not a feed is suitable for his purpose and is offered for sale at a fair price. The consumer will often find it profitable to make temporary changes in rations to take advantage of price fluctuations.

The dealer who offers for sale a feeding stuff which has not been registered or which is not guaranteed in compliance with the law is probably indifferent to his customer's interests in other respects. He does not merit their confidence or patronage. The consumer's co-operation in refusing to buy any feed which does not conform to the law in every respect will not only help in the enforcement of the law but will at the same time afford himself its protection. The State official charged with the enforcement of the feeding stuffs law is the Commissioner of Agriculture. All inquiries concerning the law and all matters relative to the registration of brands should be addressed to his office in Concord.

CLASSIFICATION

In classifying the feeding stuffs here reported the class name under which they were offered to the consumer has been used. The classes are arranged alphabetically. Table I shows the number of brands in each class, the average price per 100 pounds, the average per cent of protein, the number of pounds of protein per $1.00, the number deficient by one-half per cent protein, the average per cent of fat, the number of pounds of fat per $1.00, and the number deficient by one-fourth per cent fat.

TABLE I

Class	Number in Class	Average price per 100 Pounds	Average per cent protein	Pounds of protein per $1.00	Number deficient ½ per cent protein	Average per cent fat	Pounds of fat per $1.00	Number deficient ¼ per cent fat
Alfalfa Meal	1	1.95	20.31	10.4	0	2.00	1.0	0
Beet Pulp	1	1.30	8.45	6.5	0	0.53	0.4	0
Brewers' Dried Grains	1		23.29		0	5.47		0
Calf Meal	5	3.15	24.34	7.7	1	4.58	1.4	0
36% Cottonseed Meal	2	1.35	37.06	27.4	0	5.29	4.7	0
41% Cottonseed Meal	7	1.36	41.81	30.7	0	6.11	4.5	0
43% Cottonseed Meal	2	1.40	43.25	30.9	1	6.51	4.7	0
Dairy Feed	115	1.38	21.20	15.4	7	4.10	3.0	2
Gluten Feed	6	1.24	27.83	22.4	0	2.32	1.9	1
Gluten Meal	1	1.35	43.73	32.4	0	1.00	0.7	0
Hog Feed	4	1.68	19.39	11.5	0	5.12	3.0	0
Hominy Feed	4	1.14	11.22	9.8	0	7.02	6.2	0
Linseed Meal	8	1.67	37.43	22.4	1	5.92	3.5	0
Meat and Bone Scrap	12	2.08	51.87	24.9	0	10.42	5.0	1
Oat Products	6	1.10	8.11	7.4	1	3.02	2.7	2
Poultry Feed	106	1.91	19.37	10.1	0	5.02	2.6	6
Rye Feed	1	0.75	17.21	22.9	0	3.04	4.1	0
Skimmed Milk	7	4.31	35.12	8.1	0	0.75	0.2	0
Soybean Meal	3	1.13	42.88	38.0	0	5.42	4.8	0
Stock Feed	17	1.21	11.03	9.1	0	4.76	3.9	0
Wheat Bran	31	1.03	16.74	16.3	0	4.68	4.5	0

Wheat Red dog Flour	4	1.38	19.38	14.1	0	4.54	3.3	0
Wheat Shorts	2	1.05	18.38	17.5	0	5.90	5.6	0
	386				14			38

NUMBER OF SAMPLES FAILING TO COMPLY WITH THE LAW

While only 223 of the 386 brands analyzed complied with the law in every respect, only three brands were deficient more than one per cent in the most valuable constituent, protein. The 163 brands which did not fully comply with the law violated it on 194 counts. Nineteen brands or 4.9 per cent were deficient in protein; 14 of these were deficient one-half per cent or more. Sixty-seven brands or 17.3 per cent were deficient in fat; 38 of these were deficient one-fourth per cent or more. Fourteen brands contained an excessive amount of crude fiber. Seventy brands were deficient in carbohydrates. Twenty-three brands were offered for sale without a carbohydrate guarantee. In the tabulation of the analytical data deficiencies of one-half per cent or more of protein and of one-fourth per cent or more of fat are shown in bold-faced type.

SPECIAL FORMULA

There is an increasing tendency for the consumer to have his own formula manufactured especially for his individual use. In some instances this practice may be warranted. However, it offers the manufacturer the opportunity to clear his warehouse of inferior products which he may happen to have on hand. The manufacturer frequently quotes a lower price on these small lots than on his regular brands. Is it not probable the lower price is made possible by the use of lower grade ingredients? One state aims to protect the consumer by the following regulation.

"Batch-mixing will be allowed without registering and tagging of the final product, only when the purchaser or his agent actually comes to the mixing plant, makes a bona fide purchase of properly tagged ingredients, sees them before the mixing is done, and also assures himself that they are mixed according to the formula furnished. The feed so mixed must be delivered at once to the purchaser and not stored in the plant in an untagged condition for delivery at some future time. Unless the above conditions are fulfilled, all feed mixed according to formulas submitted must be registered for sale and properly tagged."

REQUESTS FOR THE ANALYSIS OF FEEDING STUFFS BY INDIVIDUALS

Under the Feeding Stuffs Law the Agricultural Experiment Station is charged only with the analysis of samples of feeding stuffs collected by the State Inspector under the direction of the Commissioner of Agriculture. It does, however, each year analyze a considerable number of samples drawn by individuals representing stock purchased by them for their own use. The object of the purchaser who asks to have the sample analyzed is usually to satisfy himself whether the feed meets its guarantee and if it does not, to obtain evidence upon which to base a claim for shortage.

The Station can assume no responsibility for the sampling of these unofficial samples but can only attest the accuracy of the analysis of the sample as submitted. It is practically impossible to secure a representative sample of a feeding stuff composed of several ingredients varying widely in composition without the aid of a sampling tube for drawing the sample and proper equipment for mixing it. A feed may contain as one of its several ingredients gluten meal averaging 40% protein, and as another ingredient oat feed averaging 5% protein. These materials are so different in physical condition that the shaking in transit tends to separate them even though they may have been perfectly mixed by the manufacturer before bagging. It is apparent that an accurate sample of a ton of this feed can only be had by drawing a core from several bags. The official method requires ten. Since a representative sample is as essential as an accurate analysis in judging the value of a shipment of feed it is evident that a satisfactory adjustment can seldom be effected on the basis of an unofficial sample.

Notwithstanding the objections which may be raised to the analysis of samples taken without proper sampling equipment, the Station is disposed to continue this work as long as there is evidence that it constitutes a useful service. The samples so submitted should be drawn from at least ten bags in a manner which will insure that the small lot sent for analysis is as accurately representative as possible of the

larger lot from which it is taken. Because of the cost of labor and materials an analysis is not usually warranted on a sample drawn from less than a one ton lot of feed.

A one pound sample is sufficient for the analysis. It should be sent in a glass jar or tin box to prevent the loss of fine particles and a change in the moisture content. In order that the Department may have a satisfactory record of the sample analyzed and may know whether or not the manufacturer and the dealer are complying with the requirements of the law the following information should be submitted concerning each sample.
